

Resource View Mouse Over Options

Mouse over the resource names pops up a tool tip with the resource's key value. Mouse-Right on the resource names offers the selections "Open Navigator View", and "Set Active Resource".

Mouse-Right on their "extent" backgrounds allows the setting of a vertical time mark ("Set Time Scale Line"). If both views are active for the same partial plan, the time mark is also rendered on the companion view, which is scrolled so the time mark is in the view port ("Set Time Scale Line/Snap to "Resource {Profile | Transactions}").
